

# Contractor's Guide to Commercial HVAC Financing

## PERSONALIZED FINANCING WITH fa\$tTrak™

- Generate monthly payment quotes easily
- Customers can apply online from your proposal for quick decisions
- Personalized URL can be added to your website

## LARGER ORDERS

- Total Project Financing includes: equipment, installation, duct work, extended warranties and shipping
- Applicable to residential or commercial equipment so long as end user is commercial
- Customers are less likely to scale back & more likely to spend more because the change in the monthly payment is so small to add on

## MORE PROFITABLE SALES

- No cost or discount required to use the commercial finance program
- Less credit card payments = less credit card fees
- Ask us about contractor incentives

## FASTER PAYMENT

- 100% advance payment at time of purchase to qualified contractors
- ACH payment within 24 hours of approval and signed documents
- Less accounts receivable issues
- No real estate liens

# National Sustainable Energy Group

**Faith-Based HVAC  
Financing &  
Replacement Division**

*“At the National Sustainable Energy Group, we assist churches in upgrading their older model and non-functional HVAC systems based on the mandatory EPA phaseout of R-22 refrigerant commonly known as Freon. This mandatory phaseout is due to the damage to the ozone layer and effects of climate change.”*

# Outreach Commitment

At the NSEG we view this as an opportunity to assist church denominations within the faith-based community to offer commercial HVAC financing options to replace their older model systems with new state of the art new HVAC systems and Preventative Maintenance Plan to maintain their new systems.

We will also offer One Stop Services to churches that need assistance in managing the HVAC evaluation process and selection of licensed and insured commercial HVAC contractors that offer professional installation of new HVAC equipment as well.

“We view this as an innovative national faith-based initiative for churches that have struggled over the past years with outdated and non-functional HVAC systems within their church” states Percy Brooks, CEO of the NSEG. “We see several thousand homeowners annually with Freon-based HVAC systems that are 20 to 50 years old that need replacing.”

This will be a Game Changer within the African American faith-based community.

## Initiative

The National Sustainable Energy Group (NSEG) is a leading African American owned eCommerce Heating, Ventilation, and Air Conditioning (HVAC) company. We specialize in providing commercial HVAC financing and marketing services to churches within the faith-based community across the country. We are pleased to announce the creation of the National Sustainable Energy Groups “Faith-based HVAC Replacement Division” within our company.

Through our new division we will assist churches by providing commercial financing in updating their outdated older model HVAC Freon-based systems within the African American community. The Environmental Protection Agency (EPA) phased out the use of the R-22 refrigerant commonly known as Freon globally due to the damage to the ozone layer and effects on climate change. The mandatory phaseout went into effect in December of 2020.

# Our Partnership

The NSEG is partnering with PEAC Solutions to offer commercial HVAC financing options to church denominations for Commercial HVAC Financing:

## QUICK RESPONSE

- No financials up to \$250,000
